AMAN REHMAN

SALESFORCE DEVELOPER | FORWARD DEPLOYED ENGINEER

Address : Noida, India | Phone : +91 8448595852 | Mail : amanrehman2020@gmail.com | Linkedin : linkedin.com/in/aman-rehman-dev | Trailhead: www.salesforce.com/trailblazer/amanrehman

PROFESSIONAL SUMMARY

Salesforce Developer who delivers production solutions for clients across Apex, Lightning Web Components (LWC), Flow, Agentforce, Prompt Builder, Data Cloud/Data 360, and Marketing Cloud Next. Works directly with US clients to gather requirements, present live and recorded demos, and troubleshoot platform and integration issues. Delivered an MCAE-to-Marketing Cloud Next migration and a pricing analytics dashboard handling 20,000+ records in production, and trained 400+ students on Salesforce. Four Salesforce certifications, 38 superbadges, and Agentforce League winner.

TECHNICAL SKILLS

Salesforce Development: Apex, Triggers, SOQL, Lightning Web Components (LWC), Salesforce Flow, Experience Cloud, Integration, Security

AI & Agentic Solutions: Agentforce, Prompt Builder, Agent Scripts, Custom Lightning Types, Headless Experience Layer (HXL), Headless 360

Data Cloud / Data 360: Data Streams, DLOs, DMOs, Source-to-Model Mapping, Data Explorer, Identity Resolution, Calculated Insights, Segments, Activations, Data Actions, Data Graphs, Data Transform

Marketing Cloud: Marketing Cloud Next, Account Engagement (MCAE), Dynamic Content, Data Extensions, SQL, Journey Builder, Automation Studio, Contact Builder

Integration & Delivery: REST API concepts, OAuth 2.0 / PKCE concepts, debugging, testing, documentation, client demos

Tools & Languages: JavaScript, Apex, Python, HTML/CSS, Git, VS Code

PROFESSIONAL EXPERIENCE

Software Developer | Astrea IT Services **Jan 2026 – Present**

- Deliver production Salesforce solutions for clients using Apex, LWC, Flow, and platform capabilities, including a US-based Marketing Cloud Next migration.
- Lead requirement-gathering calls with clients and present solutions through live and recorded demos.
- Build Lightning interfaces connected to Apex and Salesforce records; troubleshoot component state, navigation, and data retrieval.
- Build AI-enabled solutions with Agentforce and Prompt Builder, including contextual recommendations and conversational workflows.
- Work with Data Cloud/Data 360 for data ingestion, mapping, identity resolution, calculated insights, segmentation, and activation.
- Investigate platform and integration issues involving OAuth configuration, permissions, data flow, and component behavior.

PROJECTS

Marketing Cloud Next — MCAE Migration (US Client, Production) | *Marketing Cloud Next, Account Engagement, Data 360*

- Migrated **3 segments, 3 forms, and 3 automations** from Account Engagement to Marketing Cloud Next in production.
- **Segmentation:** Rebuilt dynamic lists as Data Cloud segments, including Lead Source filters, assigned-user exclusions, and Unified Individual-based logic.
- **Automation:** Designed Audience Flows with email actions, user notifications, timed waits, and date-based scheduling.
- **Forms:** Planned field mapping, Lead updates, Lead Source tracking, notifications, and record-assignment logic for the new forms.
- **Dynamic Content & Data Modeling:** Defined personalized Zoom Scheduler links by sales rep; worked with custom DLOs (Lead_Home, Contact_Home) and their relationships to Lead, Contact, Individual, Contact Points, and Identity Match.
- **Validation:** Investigated feature gaps, flow limitations, and fallback scenarios to define implementation requirements.

Coca-Cola Pricing Analytics Dashboard & AI Recommendations (Client, Production) | *Apex, LWC, Chart.js, Prompt Builder*

- Built and deployed an LWC dashboard in production, visualizing pricing and product insights from **20,000+ records** using Chart.js.
- Used Apex to retrieve pricing summary and material-detail records for analysis grouped by brand or product attributes.
- Connected pricing data to a Prompt Builder workflow to generate AI-assisted recommendations for business users.

Automotive Cloud Agent — Agentforce Use-Case Solution | *Automotive Cloud, Agentforce, Flow*

- Built an Agentforce-powered automotive assistant that recommends vehicles based on customer preferences and books test drives for the car-buying journey.
- Configured test-drive scheduling using Salesforce Scheduler concepts: work type groups, service territories, resources, vehicles, and available time slots.
- Built a Flow-based warranty setup that links vehicle assets to warranty terms and creates asset warranty records (term, dates, type, coverage).

Timesheet Management — Internal Project | *LWC, Apex, Experience Cloud*

- Rebuilt an existing timesheet tool as an **LWC and Apex** app on Experience Cloud, adding task edit and delete that the original lacked.
- Implemented punch-in/punch-out with picture capture and external drive storage for attendance verification.
- Built task management with duration tracking and daily summaries, plus employee profiles and attendance reports with weekly filters.
- Automated HR email alerts when employees punch out before completing nine working hours.
- Added laptop-only access restrictions, email verification, and password-reset functionality.

TECHNICAL LEADERSHIP & COMMUNITY

- **Trained 400+ students** virtually through the company's Summer Training Program, and trained interns and developers.
- Delivered 3 in-person sessions at Salesforce Community events.
- Covered Salesforce Admin and Development, LWC, Flow, Agentforce, Data Cloud, Custom Lightning Types, and Agent Scripts.
- Presented demos and facilitated quizzes explaining Salesforce platform capabilities and AI integration concepts.

CERTIFICATIONS & SALESFORCE ACHIEVEMENTS

- Salesforce Certified Platform Developer I | Agentforce Specialist | Platform Administrator | Platform App Builder
- Trailhead 5-Star Ranger; Agentblazer Champion, Innovator, and Legend; completed the 100 Days of Trailhead Challenge and 38 superbadges.
- Winner in Salesforce community challenges and events, including Agentforce 360 League and 30 Days of Slack Challenge.

EDUCATION

B.Tech in Computer Science & Engineering | Allenhouse Institute of Technology **2021 – 2025**

CGPA: 8.01 / 10
